

StemCellTalks (Toronto) is looking for a new Co-head!

Hello Stem Cell Scientists,

StemCellTalks (www.stemcelltalks.ca) is a comprehensive educational initiative that educates youth (high school students, grades 11-12) about stem cells. Each year, StemCellTalks organizes a one-day symposium to highlight the importance of stem cells in society and discusses the ethical dilemmas associated with stem cell science.

This program is a rigorous learning opportunity that exposes students to a significant and current topic in the scientific research community and provides students with an opportunity to interact with some of the leading researchers in this field of study. Participants will have the opportunity to develop important skills such as critical thinking, interactive learning, communication, and leadership. This initiative was started in Toronto in 2010 and is now also offered in Vancouver, Ottawa, Calgary, Edmonton, Hamilton, London, Montreal, and Guelph.

Toronto is looking for enthusiastic individuals who are passionate about science outreach and education to head the initiative. The Heads are responsible for fundraising, managing the budget, recruiting volunteers, overseeing the organizing committee, and making sure the event runs smoothly. This is a great opportunity to apply your research knowledge and advance your communication and leadership skills. It is also a fantastic opportunity to network with leading stem cell researchers across Canada!

If you are interested in this exciting opportunity, or if you would like to learn more, please contact Theresa (chow@lunenfeld.ca).
