

THE RAPID PASS TO PROGRESS

Turning regenerative medicine research and commercialization into powerful, affordable treatments and cures for our most costly degenerative diseases is a complex process, involving several lines of innovation and advancement. It's a journey that requires a united effort among researchers, health care systems, policy makers and business developers in the public and private sectors.

The **Ontario Institute for Regenerative Medicine** is the province's rapid pass, aligning efforts and creating momentum for fast and efficient progress in regenerative medicine. We're putting the province on the fast track to a healthier future and a prosperous economy. Find out more at www.oirm.ca.
